

ACHIEVEMENT – THE GSFC HALLMARK

Since its inception GSFC has constantly striven to re-define its role in a dynamic environment and has taken leadership role to be first at many fronts, like,

- First joint sector industrial integrated multi product complex in India
- First to adopt the steam Naphtha reforming process for manufacture of Ammonia and DCDA process for Sulfuric Acid
- First to manufacture DAP complex fertilizer in India
- First to set up Caprolactam plant in India
- First to utilize indigenous Rock Phosphate for manufacture of Phosphoric Acid
- First to set up effluent treatment facility for removing Phosphate and Fluoride from liquid effluent, and adopt DCDA technology
- First to recover Argon Gas from purge gas
- First to establish Melamine Plant in country
- First to establish Linde's Low Cost Ammonia (LCA) process in India
